We are pleased to announce the Noncommunicable Diseases Malaysia (NCDM) Conference 2025, jointly organised by NCD Malaysia and Taylor's University. This national conference reflects our shared commitment to addressing the growing burden of noncommunicable diseases (NCDs) in Malaysia. Themed "Reducing NCD Burden: A National Priority," the conference aims to strengthen collective action by bringing together key stakeholders from healthcare, research, civil society, policy, and industry.

This three-day conference will provide a vital platform to exchange knowledge, foster cross-sectoral collaboration, and explore the latest strategies in NCD prevention, early detection, integrated care, and health system strengthening. The scientific programme will feature expert-led sessions across several key domains including cardiovascular and metabolic health, respiratory diseases, neurology and mental health, diseases of aging, and skin conditions. Through plenaries, forum, and interactive discussions, participants will gain fresh insights and contribute to shaping a more coordinated national response to NCDs.

We warmly welcome all individuals and organisations committed to improving public health outcomes to be part of this important event. Together, let us bridge gaps, build hope, and empower lives in the fight against NCDs.
